Crimp

2.5mm
(.098") pitch

XH CONNECTOR

Disconnectable Crimp style connectors

Emboss Tape

Radial Tape

The XH connector was developed based on the high reliability and versatility of our NH series connectors. The connector is very small with a mounting height of 9.8mm (.386"). Yet it meets the needs for high-density mounting and miniaturization of electronic equipment, including VCRs, radio-cassette players, and car stereo systems.

Features

• **Original folded beam contact**

The protected, folded beam contact in this connector provides high contact pressure with an over-stress stop feature. This ensures dependable continuity when used with low voltage, low current carrying circuits (dry circuits). The wire crimp section is mechanically decoupled from the post insertion section which, in turn, prevents the mating area from being adversely affected by crimping.

• **Box-shaped shrouded header**

The four-sided, box-shaped shroud prevents the receptacle from being misinserted or pried during insertion and removal. The shroud also prevents foreign matter from reaching the posts and resists contact deformation due to handling and shipping. Furthermore, a serrated, oversized square post is pressure-fit into each square hole to completely protect the post against heat and to prevent flux from entering during dip soldering.

• **Header with a boss**

This header has a boss (projection) on the bottom of the housing to prevent improper insertion in printed circuit boards.

• **Whisker prevention**

The contact is treated with a reflow process and the square post is copper-undercoated and tin/lead-plated to prevent whiskers from being generated.

• **Interchangeability**

This header is interchangeable with those of 2.5mm (.098") pitch insulation displacement NR, NRD and BR connectors and board-to-board JQ connectors.

• **Conforming to the HA terminal**

The 4-circuit XH connector conforms to the HA terminal specified in JEM 1427 (Japanese Electric Machine Industry Association Standards).

Specifications

- Current rating: 3A AC, DC (AWG#22)
 - Voltage rating: 250V AC, DC
 - Temperature range: -25°C to +85°C
(including temperature rise in applying electrical current)
 - Contact resistance: Initial value/10m Ω max.
After environmental testing/20m Ω max.
 - Insulation resistance: 1,000M Ω min.
 - Withstanding voltage: 1,000V AC/minute
 - Applicable wire: AWG #30 to #22
 - Applicable PC board thickness: 1.6mm(.063")
- * Contact JST for details.

Standards

- Recognized E60389
- 1 Certified LR20812
- 2 R75085

Taping specification of through-hole type shrouded header

Note: Conforms to JIS C 0805.

Packaging specifications of through-hole type shrouded header

Package type	Flat pack (zig zag folded)
Distance between folds	24 indexing holes perfold (304.8mm/12")
Box size	(316x45x330mm)12.4"(W)x1.8"(D)x13.0"(H)
Distance between the end of the tape and the first connector's center line (either end)	19.05mm(.750")

Products of different packaging specifications are also available. Contact JST for details.

Through-hole type PC board layout (viewed from soldering side) and Assembly layout

Note:

1. Tolerances are non-cumulative: $\pm 0.05\text{mm}(\pm .002")$ for all centers.
2. Hole dimensions differ according to the kind of PC board and piercing method. If printed circuit boards made of hard material such as FR-4 are used, the hole dimensions should be larger. The dimensions above should serve as a guideline. Contact JST for details.
